GASKIN

Amina

31 weeks pregnant

Clinic: Dala Primary Health Centre
Health worker: Hauwa Musa, CHEW
Date: Thursday, 5 November 2026

Danger signs: go to the clinic now — Call 112

Bleeding from the vagina

Very bad headache

High fever

Baby moving less

If you see any of these, do not wait. Go to Dala Primary Health Centre or the nearest hospital.

1 Bleeding is an emergency

Any blood from your private part: go to the clinic at once. Do not wait.

2 Iron and folic acid daily

Take one iron tablet every day with water or orange. It makes your blood strong.

Every day until 3 months after birth

3 Eat iron-rich foods

Eat ugu or other green leaves, beans and a little liver or fish this week.

4 Sleep on your left side

From now until birth, lie down to sleep on your left side.

5 Sleep under a treated net

Sleep under the mosquito net every night, and keep it tucked in.

6 Pack your birth bag

Put wrappers, baby clothes, pads, soap and your card in one bag by 36 weeks.

By 36 weeks

7 Let your family help

Ask your husband and mother-in-law to help with heavy work and to bring you to the clinic.
